

CHINGFORD WTW

Customer:	MJ Gleeson
Site Owner:	Thames Water
Approx. Value:	£850k

Working with MJ Gleeson and Thames Water under their Trident West Agreement, FSD were awarded the main contract for the works at Chingford South WTW. FSD were brought in at an early stage of the project and carried out the design development, which was used as a basis for creating a Target Price.

The short program of works, a compact site and a water in to supply date which could not move meant that the design and installation had to be flexible in order not only to maintain productivity but also meet MJG's key dates for commissioning. Despite these restrictions, Trident West were able to meet all of their key dates and water was put in to supply on time.

Our works on this project included the following:

- Supply and installation of Power, Control, Instrumentation and Comms cables to and from 7 MCC's
- Supply and installation of Building Services within 6 buildings
- Supply and installation of Addressable Fire Alarm System
- Installation of Power and Alarm Cables for site wide CCTV and Intruder Alarm Systems
- Installation of Free Issue Ventilation Control Panels
- Supply and Installation of Street Lighting
- Supply and Installation of External Process Lighting
- Supply and Installation of Local Control Stations for Pumps, Drives and Actuated Valves
