

LUTTERWORTH STW

Customer:	Bewater
Site Owner:	Severn Trent Water
Approx. Value:	£81k

Bewater Treatment Limited are one of the most successful contractors in the UK Water Industry and continue to win major projects and frameworks throughout England and Scotland.

In February 2006, after a thorough selection process, FSD were chosen as one of Bewater's four main contractors for their Electrical and Instrumentation Installation services Framework. Since that date we have completed a number of high profile schemes within the Severn Trent Water region, including the electrical installation work associated with the new process extension works at Lutterworth STW.

FSD's scope of work at Lutterworth consisted of the following:

- Electrical design works
- Modifications to existing cabling
- Installation of new power, control and instrument cables
- Design and installation of new cable-containment systems
- Installation of instrumentation, including level switches, ultrasonic level detectors, flow transmitters pressure switches, temperature switches, sludge blanket level detectors and a phosphate monitor
- Minor external lighting works
- Building services, including small power and heating
- Lighting and emergency lighting to CIBSE recommendations
